

wedi Tools | cavity dowels set

- For mechanically fixing light objects to tiled wedi building boards

General product description

Special cavity dowels for fixing light objects to tiled wedi building boards/foam elements.

Applications

To fix light objects such as soap dishes, toilet paper holders, towel holders etc. to tiled wedi building boards/foam elements.

Processing information

Drill a 6-mm hole. Remove drilling dust. Hammer in dowel.

Technical properties

Allowable load

0,12 KN

The specified values refer exclusively to tiled building boards where the board's thickness is a minimum of 20 mm. Installation on building boards with other finishes (plaster, etc.) is not permitted. For loads more than 25 kg (e.g. bath handrail) anchoring in a stable, load-bearing surface is required. This must be planned on site where necessary. A detailed overview of all bath accessories which can be mounted using wedi cavity dowels can be found at www.wedi.eu

Packing

10 dowels and 10 screws in PE bag

Storage

Store dry.

Safety notice

none
