

## Fundo RioLigno

### Shower solution for timber floor

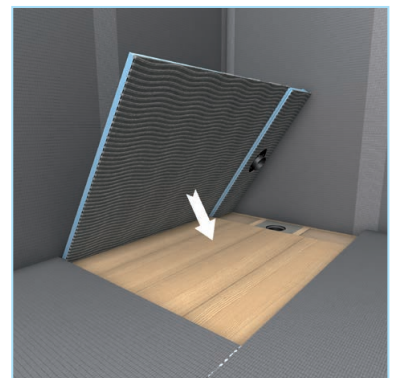

The fully sealed slim shower element is developed especially for installation in suspended timber floors. Thanks to its thickness of just 25 mm at the outer edges, it can be integrated flush with existing floorboards without time-consuming levelling measures. The result is an accessible walk-in-shower with elegant linear drainage and peace of mind about the moisture-sensitive timber floor.

The wedi Fundo channel drain-substructure element provides secure and tailored support for the drain under the Fundo RioLigno.

Thanks to the low height at its outer edges, flush-to-floor installation with the Fundo RioLigno is simple and straightforward.

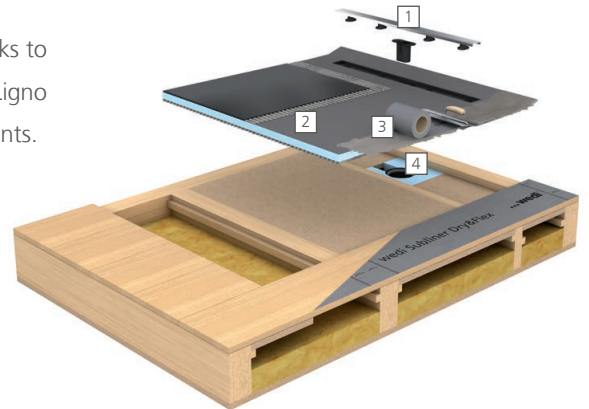

It can also be installed on top of floorboards in conjunction with wedi building boards to level the height.

## Unbeatable on timber

Special care must be taken when sealing surfaces that are sensitive to moisture. Thanks to being sealed and tested in the factory, just like all other Fundo floor elements, the RioLigno is easy and safe to install and is 100 % compatible with other wedi system components.

### Used products

- 1 wedi Fundo channel cover ■ Here with exclusive design, length 700 mm
- 2 Fundo RioLigno ■ Flush-to-floor shower element for suspended timber floors
- 3 wedi Fundo sealing set ■ Specially for sealing to adjoining surfaces
- 4 wedi Fundo channel drain ■ Here with DN 50 horizontal drain  
wedi Fundo channel drain-substructure element ■ For secure positioning of the drain

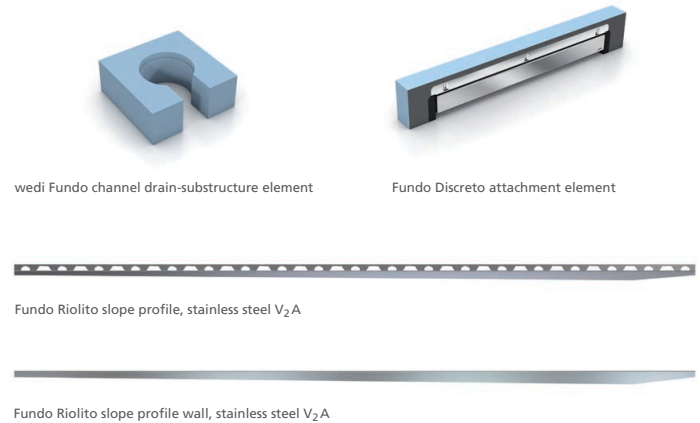

## Fundo RioLigno
